Summary

Aspiring AI/ML Engineer with hands-on project experience in Python, TensorFlow, and PyTorch, specializing in Generative AI — RAG pipelines, LLM fine-tuning (LoRA/PEFT), and LLM-based evaluation. Skilled in Deep Learning, Computer Vision, and NLP, seeking to build scalable, real-world AI systems.

Skills

Programming & Querying: Python, SQL, MySQL, MongoDB, SQLite, FastAPI

ML / DL Frameworks: TensorFlow, PyTorch, Scikit-learn, Keras, XGBoost, NumPy, Pandas, LSTM

Generative AI & LLMs: LLMs, NLP, RAG (Retrieval-Augmented Generation), Prompt Engineering, LangChain, LlamaIndex, ChromaDB, Hugging Face Transformers, LoRA/PEFT (Fine-tuning), LLM-as-judge, Red-teaming / Adversarial Testing

Computer Vision: OpenCV, YOLO, CNN, Transfer Learning, Object Detection, MediaPipe

Data Visualization Tool: Matplotlib, Seaborn, Plotly, Power BI

Work Experience

Xylofy AI

June 2026 – July 2026

AI & Data Science Intern

- Built an end-to-end sales forecasting system on 4 years of retail data, comparing SARIMA, Prophet, and XGBoost models for demand prediction.
- Implemented anomaly detection (Isolation Forest, Z-Score) and K-Means product segmentation; deployed an interactive Streamlit dashboard on Streamlit Cloud.

Projects

CortexGuard — LLM Safety Auditing Platform | *LangChain, LlamaIndex, ChromaDB, Detoxify, Docker* Jul 2026

- Built an automated LLM safety auditing platform testing 275 adversarial prompts across 8 bias categories using rule-based + LLM-as-judge scoring, catching bias in up to 44% of cases missed by toxicity classifiers.
- Implemented a self-improving red-team loop with LlamaIndex retrieval and auto-remediation, achieving a 90.3% verified bias-fix rate without retraining. **GitHub**

Papyrix — Research Paper Q&A Assistant (RAG) | *Python, LangChain, ChromaDB, LoRA/PEFT, Docker* Jul 2026

- Built an end-to-end RAG system answering questions across multiple research papers with page-level citations, using sentence-transformer embeddings and ChromaDB vector storage.
- Fine-tuned the embedding model via LoRA/PEFT on 224 domain-specific pairs, improving Recall@1 by 1.75%; tracked experiments with MLflow. **GitHub**

Indian Sign Language (ISL) Translator | *Python, TensorFlow, LSTM, MediaPipe, FastAPI, Docker* Apr 2026

- Built a real-time ISL translation system recognizing 262+ gestures via LSTM sequence models and MediaPipe-based 126-point hand landmark extraction, achieving 90% accuracy.
- Optimized inference to 100ms via FastAPI backend; added NLP sentence generation and TTS. **GitHub**

MedScan AI — Chest X-Ray Disease Detection System | *Python, PyTorch, OpenCV, Streamlit* Mar 2026

- Developed an AI system detecting 14 chest diseases using DenseNet121 on the NIH ChestX-ray14 dataset (112k+ images), achieving 0.82 mean AUC for multi-label classification.
- Integrated Grad-CAM for explainability and MC Dropout for uncertainty estimation. **GitHub**

Certifications

- **Oracle Cloud Infrastructure 2025 Certified Generative AI Professional** — View Credential (Sep 2025)
- **Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate** — View Credential (Sep 2025)
- **Green Skills and Artificial Intelligence** — Edunet Foundation (AICTE Skills4Future Program) — View Credential (Jan 2026)

Education

B-Tech in Artificial Intelligence & Machine Learning

Sharnbasava University (Exclusively for women)

Expected Graduation: 2027

CGPA: 7.4 / 10 (latest available)
